Methodology & Indicator Equivalence Notes:

1. **Zero Tolerance Wick Containment:** A touch requires exact containment  $low \leq level \leq high$  with zero tolerance. 2. **Prior-Bar Anchor Rule:** Retest of swing anchor (0.0% level) automatically flips swing direction; scanner tests both current and yesterday's drawn anchor. 3. **Volume Profile:** Exact replica of TradingView 100-bin triangular distribution from swing anchor to current bar. 4. **Disclaimer:** Educational and quantitative research report. Past performance does not guarantee future results. Verify on TradingView chart before executing.
